About

Adaptable and detail-oriented developer experienced in building responsive web applications incorporating a range of front-end technologies. I am a collaborative team player and proactive contributor eager to create beautiful user experiences with performance, accessibility and best practices at the forefront.

Experience

Front-end Developer   2021 - Present

Developed > 20 responsive, static and dynamic web applications prioritizing functionality and intuitive design. Familiar with development and deployment processes for front-end technologies. Notable projects:

- *Portfolio Website:* A highlight of my latest projects and professional development. Designed for mobile and desktop.
- *Travel Journal:* Single page React application which utilizes reusable card components and an integrated Swiper API to document my travels and photos.
- *Rolling Fish Sushi Website:* Catering services landing page with a mobile-first approach for an easy to navigate client experience. Built with HTML, CSS and Bootstrap.
- *Meme Generator:* Fetches random meme images from a RESTful JSON API and allows users to input text to create custom memes. Built with React.js.
- *Feed-A-Star-Mole:* Based on the Whack-A-Mole game, this fully functional desktop game incorporates JavaScript Event Listeners and DOM manipulation to identify user events.
